Indo-German Healthcare Dialogue

Cancer is a disease that poses enormous challenges to both Germany and India's respective healthcare systems and economies. State-of-the-art research and international partnership is required to overcome the challenges of this scale. German and Indian scientific research centres - as well as research-oriented pharmaceutical companies - are gathering valuable expertise in the fields of early diagnosis, effective cancer treatment and metastasis prevention. All sides stand to benefit from dialogue and exchange on current developments.

The HEALTH MADE IN GERMANY initiative established the "Indo-German Healthcare Dialogue" in 2011 with the sole aim of providing a platform that allows Indian and German stakeholders a forum for regular interaction.

The next "Indo-German Healthcare Dialogue" will take place on Tuesday, September 19, 2017, at the Taj Mahal Palace Hotel, New Delhi, India. The focus of this year's event will be on recent advances in early diagnosis and cancer treatment and how innovation in India can be strengthened through a collaborative approach with German partners. You are cordially invited to participate at the forthcoming event entitled, "Advances in Cancer Research: An Indo-German Dialogue for Innovation", supported by HEALTH MADE IN GERMANY, vfa and OPPI.

REGISTRATION INFORMATION:

Registration is without cost, but it is mandatory to register and to receive a confirmation prior to attending the Conference. Only limited registered participants will be admitted at the conference.

Registration form can be downloaded from www.elgabiotech.com or by sending a request to:
